

10000psi IHPU

Pumping & Injection Systems

DESCRIPTION

The 10000psi IHPU can be used for numerous Subsea applications including pressure testing, BOP operation, fluid transfer and hot stab operations with the capability of directional control ranging from 0–10000psi which can be operated proportionally. Designed to be easily and simply reconfigured, with the minimum of hassle.

Connection can be made to any sized fluid reservoir and operate using Water/ Glycol and Hydraulic mineral oils as suitable fluid media.

FEATURES

- 690bar / 10000psi output
- Directional control
- configured for numerous subsea applications
- Simply connect reservoirs
- Can be configured with fluid reservoir skid

10000psi IHPU

Pumping & Injection Systems

SPECIFICATIONS

HYDRAULIC INPUT

- Pressure 210Bar (3000psi)
- Flow 35–65Lmin

HYDRAULIC OUTPUT

- Pressure 690Bar (10000psi)
- Flow 30Lmin

GENERAL

- Directional Control up to 10000psi
- Pressure test capability with depressurisation valves
- Easily Reconfigured for Subsea applications

FLUIDS

- Water/Glycol
- Hydraulic Mineral Oil

WHAT'S IN THE BOX

- 10,000psi IHPU
- Operational hoses
- Operation manual

PART NUMBERS & OPTIONS

SRTS-50	10,000psi IHPU
SRTS-50-S	Remote location spares kit

15L, 30L, 40L, 50L, 100L, 200L Reservoir bags available from standard sizes
